

Course Policy for COMP 3015/3012/4669

Submitting assignments and labs

All assignments and labs must be submitted by providing a link to a **private** GitHub repository. Each lab/assignment submission must also have a link to a demo video where you present the major parts of the application you've built. You don't need to show every detail in the demo videos, but they should show that your software works as intended.

Extensions

If you need an extension, please reach out to me at least 24 hours before the deadline. Please provide information including the course you're in, the lab or assignment number and the specific area that you need more time for. Extension requests will not be granted the same day as the due date.

Late work submissions without an extension

All course work must be submitted prior to the day of the final exam. Late work will incur a 10% per day deduction unless otherwise agreed upon.

Group Work

For any group/team assignments, ensure you communicate frequently and professionally with your teammates throughout the duration of the project. At the end of group projects, team members will provide feedback on one another, which will be taken into consideration during marking.
